From empty books to your first invoice

Edition 1.0
October 2026

Do these six things in order. You will create the company, add one customer, add one item, post one purchase and one sale, then check that the books balance. Stop after step 6; everything else can wait.

> **Have this ready:** business name and GSTIN, owner name and email, a password of at least 8 characters, one customer, one supplier, one item with its HSN and GST rate, and the date your books should begin.

1 Set up the company

FIRST LAUNCH · "FIRST RUN SETUP"

FIELD	WHAT TO ENTER
Business name	The name printed on invoices.
Owner name, phone	The first user; the phone is optional.
Owner email	Your sign-in name.
Password	At least 8 characters. There is no email reset in this edition.
State, GSTIN	State code is two digits (27 for Maharashtra). GSTIN is 15 characters.
Books begin	The first day this app records transactions, not the financial year. Starting fresh? Use 1 April or today.

Click **Create company and sign in**. You can change the company details later in Admin → Company.

2 Learn the one pattern every voucher follows

SALES, PURCHASES, RECEIPTS AND PAYMENTS

01 **Header** — Party, date, due date, reference, place of supply. →
02 **Lines** — Item, quantity, rate, discount, GST. →
03 **Totals** — Taxable value, tax, round off, total. →
04 **Post** — The number is assigned and the books change.

> **THE ONE RULE**
> Nothing is saved until you press **Post**. Closing the screen or pressing **Cancel** discards the entry.

3 Add one customer and one supplier

PARTIES → ALL PARTIES → NEW PARTY

Enter **Name**, **Phone**, **GSTIN** and **State code**. Set **Credit days** (30 is common). Leave **Opening balance** at zero for a new business. Tick **Customer**, **Supplier**, or both. Click **Add party**.

The role cannot be changed after saving. A customer with a Karnataka GSTIN uses state 29; a Maharashtra customer uses 27. This decides CGST + SGST or IGST on the sale.

4 Add one item

ITEMS → ITEMS → NEW ITEM

Enter **Name**, **SKU**, **HSN / SAC**, choose a **Unit** and **GST rate**. Enter the **Sale price** and **Purchase price**. Tick **Service item (no stock)** only for a service. Leave opening quantity at zero for now. Click **Add item**.

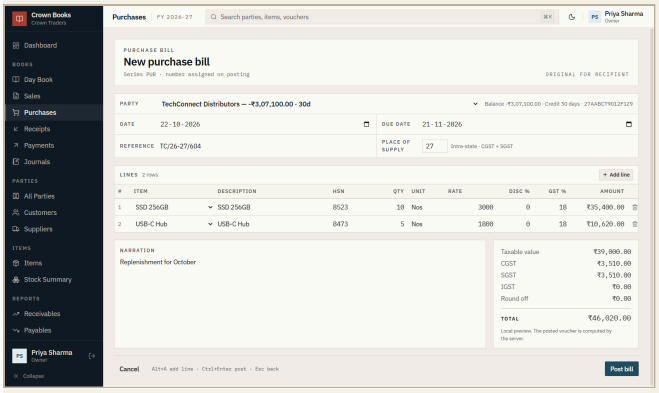

Continue on page 2: one purchase, one sale, one check.

One purchase, one sale, one check

Edition 1.0
October 2026

5. Post a purchase bill

BOOKS → PURCHASES → NEW BILL

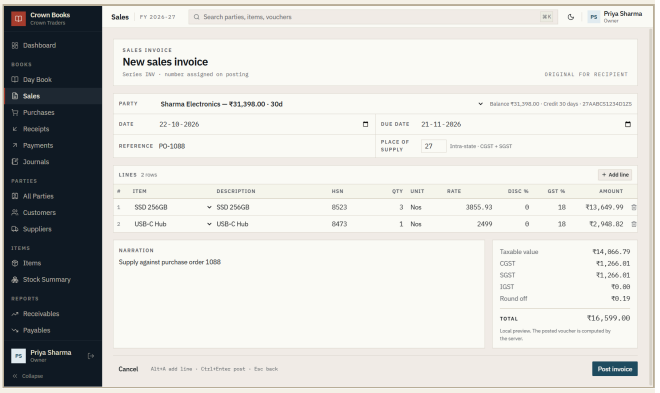

A purchase bill with two lines. The total is calculated before posting.

1. Choose the **supplier**.
2. Check the **Date** and **Due date**.
3. Enter the supplier's bill number in **Reference**.
4. **Place of supply** is the supplier's state.
5. **Add line**, choose the item, then enter **Qty**, **Rate**, **Disc %** and **GST %**.
6. Check the **Total** against the paper bill.
7. Click **Post bill**.

> **TIP**
>
> Posting the bill does not pay it. It records what you owe the supplier.

6. Post a sales invoice

BOOKS → SALES → NEW INVOICE

A sales invoice for a Maharashtra customer, so the tax is CGST + SGST.

1. Choose the **customer**.
2. Check the **Date** and **Due date**.
3. Enter the customer's purchase order in **Reference**.
4. **Place of supply** is the customer's state. Different state means IGST.
5. **Add line**, choose the item, then enter **Qty** and **Rate**.
6. Check the tax split and **Total**.
7. Click **Post invoice**.
8. Open the invoice and click **Print**, or choose **Save as PDF**.

> **THE MOST COMMON GST MISTAKE**
>
> The place of supply defaults to your company's state. Change it to the customer's state before posting an out-of-state sale.

Finish in 60 seconds

- [ ] Open **Reports → Trial Balance**. It must say "Debits equal credits."
- [ ] Open the sale and click **Print**. If the paper looks right, the invoice is right.
- [ ] Open **Admin → Backup** and click **Create backup**. Do this before you stop for the day.

If something looks wrong

- [ ] Wrong party, date, item or amount? Cancel the voucher with a reason and enter it again. Never edit a posted voucher.
- [ ] Wrong GST? Check the place of supply and the GST rate on the line.
- [ ] Stock looks double? Do not enter opening stock and purchase history for the same goods.
